

Calf Canopy Benefits

The Calf Canopy allows producers to house their livestock in a well managed, healthy, group housing environment at a very low cost. We have witnessed:

- ✓ **Calves reaching or exceeding the target weaning weight by 6-7 weeks of age**
Up to a 25% potential cost reduction (reduced from 8-10 weeks)
- ✓ **Calves reaching or exceeding the target breeding weight by 11-12 months of age**
A net reduction of 15% (reduced from 13-15 months)
- ✓ **35% savings in time and labour (compared to individual housing in hutches)**

Additional Benefits:

- Easy to clean
- No building permit required
- Drier environment is easier to maintain
- Improved Calf Welfare (no more bawling calves)
- Low stress weaning transition
- Easy to integrate into current farm layout
